COMPANY OVERVIEW

Sparrow Interactive Pvt. Ltd. is a technology-driven, experiential solutions company specializing in 3D architectural visualisation, immersive technologies, and experience centers - offering end-to-end services for a real-estate branding campaign.

With over three decades of industry pioneership, we have collaborated with over 250 esteemed developers, corporations and institutions to bring their vision alive through photorealistic visualisation, precision scale models, VR/AR experiences and interactive installations.

Our solutions across 2500 projects in India and Middle East aim to communicate complex projects in engaging, intuitive, and visually compelling ways. Established in 1996, we started with web designing, took our first step towards 3D ArchViz in 2003, created inhouse scale models in 2012, launched experience centres in 2018, and now, in 2026 moving towards a new chapter to venture in technology and produce smarter models and systems.

With a team of more than 150 digital evangelists, we sit at the intersection of technology, creativity and innovation. Striving towards this aspiration has turned us to into experts of the Phygital Space; helping clients sell the unbuilt, not just via visual storytelling, but by offering lifelike experiences integrated through digital systems.

Our solutions include turnkey Brand Centers for real estate, Architectural CG, Multitouch environments, Projection Rooms, Projection Mapping, Physical Scale Models, Augmented Reality, Virtual Reality and similar tech-based solutions.

Our brand philosophy of '*Amaze. Delight. Repeat.*' drives us to *amaze* our clients in ways more than one, *delight* their customers' senses through such an all-consuming experience that is sure to have them *repeat* the process with us multifold, every single time.

As the world continuously evolves into a place where immersive experiences are the key to unlocking a new future, we at Sparrow are ready to take on as the Ultimate Phygital Experience Agency that has elevated the Real Estate experiences to the next unthinkable level.

This has earned us the trust and partnership of trailblazers like Reliance, Adani Group, Godrej, EMAAR and many more.

SERVICES OVERVIEW

We provide end-to-end solutions to curate a holistic branding campaign:

1. Architectural Visualisation

a. Photorealistic 3D renders for marketing and approvals
b. Cinematic walkthroughs showcasing spatial flow and design intent
c. Architectural films with drone and location integration
d. High-detail rendered stills for brochures, hoardings, and digital campaigns
e. Web-enabled interactive 3D experiences for remote exploration

2. Scale Models & Physical Representations
   a. Masterplan models (residential, commercial, retail, industrial)
   b. Interior and sectional models for detailed spatial understanding
   c. Landscape and location models for contextual storytelling
   d. Projection-mapped and synced models integrating AV and lighting
   e. Mounted, hydraulic, and dynamic models for enhanced presentation impact

3. Immersive & Interactive Technologies
   a. Virtual Reality (VR) walkthroughs for immersive exploration
   b. Augmented Reality (AR) overlays for enhanced engagement
   c. Interactive touch tables and digital navigation systems
   d. Interactive walls and gesture-based interfaces
   e. Custom-built applications to simplify complex project communication

4. Phygital Experiences & Brand Environments
   a. End-to-end experience center design and execution
   b. Customer journey spaces integrating physical and digital touchpoints
   c. Projection rooms and immersive theatres
   d. Multi-screen and projection mapping environments
   e. Seamless integration of models, visualisation, and interactive tech

5. Digital Presentations & Deployment Systems
   a. Interactive presentation platforms for sales and exhibitions
   b. Projection-based storytelling tools (eBooks, mapped content, AV systems)
   c. Environmental and spatial graphics for brand communication
   d. Content development and deployment across digital interfaces
   e. Hardware integration for turnkey execution

USP

Three aspects define our approach:

1. Industry Pioneership – we were amongst one of the first companies in India to introduce high-precision 3D architectural visualisation and immersive scale models.
2. Phygital Experiences – Integrating digital technologies and services in physical installations, so that the room speaks for itself.
3. End-to-end Solutions – Our dynamic team of experts manages the entire pipeline – from concept and visualisation to tech-enabled interactive installations.

However, what sets us apart is our ability to turn challenges into opportunities; and opportunities into elegant solutions.

1. We were the first Indian firm to introduce photorealism in architectural 3D in 2006.
2. First to introduce locally produced, high-quality scale models in the Indian market in 2012,
3. First to level up experiential solutions through holographic imagery, multi-touch environments in 2013,
4. First to create a three-sided screen, ready to set up immersive experience in 2026. We no longer must wait to install a site.

We find gaps in the market, and our instinct is to fix it. A Bonafide example of how looking inwards can answer all your queries.

CLIENTELE OVERVIEW

Top Clients – North India (in no particular order)

1. Godrej
2. DLF
3. Gaurs
4. Ace
5. EMAAR
6. M3M

Across these six developers alone, we have delivered over 120 projects in the last decade.

Top Clients – West India (in no particular order)

1. Reliance
2. Adani Enterprises
3. Runwal Group
4. Paradise Group
5. Purvankara

6. Godrej

Across these six developers, we have delivered over 200 projects in the last decade.

Top Clients – South India (in no particular order)

1. Godrej
2. Rajapushpa
3. Purvankara
4. Sattva Group
5. Brigade
6. Lansum

Across these six developers alone, we have delivered over 100 projects in the last decade.

Top Clients – India (in no particular order)

1. Reliance
2. Adani Enterprises
3. Godrej Properties
4. DLF
5. Brigade Enterprises
6. IndiaBulls
7. EMAAR
8. Runwal Group
9. Sobha Realty
10. Lodha Group

For confidentiality reasons, not all collaborations can be publicly disclosed.

CASE STUDIES

1. **M3M CAPITAL, SEC 113 (Gurgaon)**

M3M Capital, Sec 113 — A luxury residential EC that translated golf-style living into a guided spatial journey using immersive AV, projection-mapped models, and apartment exploration tools.

M3M Capital is positioned on Dwarka Expressway as a premium residential development centered around golf-style living, with landscaped greens, lifestyle amenities, and aspirational urban homes.

How Sparrow translated the brief into the EC:
Instead of treating the space as a generic sales gallery, Sparrow turned the existing shell into a layered lifestyle narrative around golf-inspired luxury. The experience was structured into three clear parts: an immersive AV room with a 23 ft curved screen and projection-based 9 ft model, a model room with miniature landscape and USP storytelling, and a product zone with apartment explorer pods, VR tools, and an interactive touch table. This allowed users to move from aspiration to spatial understanding to product exploration in a seamless flow. The visual language—soft curves, perforated partitions, integrated greenery, and controlled lighting—helped express refined, holistic living rather than just displaying inventory.

Short summary:
An installation-led experience centre that transformed an existing shell into a guided luxury journey, using immersive AV, projection-mapped models, and interactive exploration to express golf-style living.

2. **EMAMI AASTHA, JOKA (Kolkata)**

Emami Aastha — A biophilic experience centre that translated an urban-forest villa township into a calm, nature-led spatial journey.

Emami Aastha is envisioned as a villa township rooted in nature, with an emphasis on greenery, tranquility, and a slower, more balanced way of living.

How Sparrow translated the brief into the EC:
Sparrow approached the space as an extension of the landscape rather than a built interior. The planning introduced organic movement paths, curved zoning, and layered green installations, creating a natural flow across reception, AV, product, and transaction areas. Materials like wood, textured finishes, and soft lighting were used to create warmth and calm. Instead of relying heavily on technology, the design allowed the environment itself to communicate the project's ethos—ensuring visitors feel the stillness, openness, and connection to nature before engaging with product details.

Short summary:
A nature-driven experience centre that uses spatial flow, materiality, and greenery to express villa living as a calm, immersive, and emotionally engaging environment.

3. **GAURS TRECENTO (Noida)**

Gaurs Trecento — A high-impact immersive EC that translated art-inspired, aristocratic luxury into a dramatic, technology-led spatial experience.

Gaurs Trecento is positioned as a premium residential offering inspired by art, exclusivity, and a refined, aristocratic lifestyle.

How Sparrow translated the brief into the EC:
Sparrow created a controlled, cinematic environment where technology drives the narrative. At the core is a 360° LED installation integrated with a projection-based model, allowing users to experience the project in a fully immersive format. The space uses dark, high-contrast interiors, focused lighting, and bold spatial composition to amplify visual impact and brand recall. AV walkthroughs and curated product displays are layered into this environment, ensuring a guided and high-intensity experience aligned with the project's premium positioning.

Short summary:
An immersive, technology-driven experience centre that uses LED environments, projection models, and cinematic space design to express high-end luxury and strong brand identity.

4. **RELIANCE INDUSTRIES, JAMNAGAR**

RIL Jamnagar — An industrial experience environment that translated complex refinery processes into intuitive, interactive storytelling systems.

The project required simplifying and communicating the scale and complexity of one of the world's largest refinery operations in an engaging and understandable manner.

How Sparrow translated the brief into the EC:
Sparrow broke down the refinery into modular, interactive storytelling units. Sensor-based standees integrate 32-inch LED displays with physical glass tubes containing actual materials, allowing users to connect digital information with tangible elements. An interactive history slider narrates the evolution of the company, while an LED floor-based model with integrated media explains refinery scale and operations. A curved AV projection room provides a larger immersive overview. These layered tools enable users to explore information progressively rather than being overwhelmed.

Short summary:
An interactive industrial experience that uses sensor-based installations, LED media, and immersive AV to simplify and communicate complex processes.

5. **RIVERSCAPE BY ARETE, VAPI**

Arete Riverscape — A community-led EC that translated riverside villa living into a fluid, wellness-driven spatial experience centered around connection and lifestyle.

Riverscape is positioned as a riverside villa community focused on social living, wellness, and active lifestyles for all age groups within a serene natural setting.

How Sparrow translated the brief into the EC:
Sparrow designed the experience as a flowing spatial journey inspired by the river, using fluid flooring patterns and sculptural walls with punctured openings to guide movement and create layered discovery. The ambience is intentionally serene, with soft lighting and biophilic integration. The narrative focuses on community interaction, wellness, and activity, shifting attention from individual villas to shared experiences—spaces where people connect, engage, and belong. Technology supports the story, but the space itself carries the emotional weight.

Short summary:
A narrative-driven experience centre that uses fluid design, sculptural elements, and immersive ambience to express community living and wellness-led lifestyle.

6. **LANSUM EVANA, CHEVELLA (Hyderabad)**

Lansum Evana — A site-integrated EC that translated a nature-driven villa habitat into a transparent, biophilic, and wellness-focused experience.

Lansum Evana is envisioned as a nature-integrated villa community promoting slow living, clarity, and a strong connection to environment and community.

How Sparrow translated the brief into the EC:
Sparrow designed the experience centre as two glass pavilions connected by a landscaped passage with water and greenery, embedding it within the township itself. The first block features a 22 ft LED screen behind reception with gravel-based seating to create a calm entry, while the second block enables deeper engagement through an 11 ft LED interactive screen, physical model, and sectional villa display. Technology is integrated into planter-based installations and organic edges, blending digital exploration with landscape. The glass façade allows direct visual connection to the actual villas under construction, reinforcing authenticity.

Short summary:
A biophilic, site-integrated experience centre that combines glass architecture, landscape, and interactive tools to express slow living and nature-connected lifestyle.

7. **INDIABULLS ESTATE & CLUB – DHANI (Gurgaon)**

Indiabulls Estate & Club Dhani — A club-inspired EC that translated estate living into a lounge-driven, community-focused spatial experience.

The project is centered around estate living with a strong emphasis on club lifestyle, social interaction, and shared amenities.

How Sparrow translated the brief into the EC:
Sparrow designed the space as a double-height glass pavilion centered around a large physical masterplan model, placed within a lounge-like seating environment. This shifts user behavior from passive viewing to active engagement. A 14 ft LED screen anchors the narrative, while a rear passage leads to a tech-enabled zone with project exploration tools and credibility storytelling. The upper floor houses meeting and conference spaces, ensuring a smooth transition from experience to decision-making while keeping the ground floor purely experiential.

Short summary:
A lounge-driven experience centre that uses spatial openness, central model planning, and integrated media to express community living and club lifestyle.

LEADERSHIP INFORMATION

Sparrow Interactive was founded in 1996 by co-directors Rashmi Kohli and Ashish Mahajan.

Their leadership combines creative innovation, technological expertise, and operational execution, which has shaped the firm's growth in immersive visualisation and experiential solutions.

Rashmi's trailblazing endeavors in creative direction, innovation, and the integration of emerging technologies in our storytelling have always kept Sparrow ahead of the curve. Ashish's operational expertise and technology strategy has ensured that our solutions remain advanced, and teams execute efficiently.
